Values ▸ Stewardship ▸ Impact

WE SEEK TO

Provide consistent performance benchmarked to the MSCI All Country World ex-U.S. Index.

Enable values alignment in a portfolio that offers exposure to both developed and emerging market international companies.

PROCESS CHARACTERISTICS

Apply multi-factor optimization, minimizing tracking error and optimizing ESG characteristics.

Integrate Values + ESG screens.

REAL IMPACT TODAY

Influencing corporate policy through collaborative shareholder advocacy.

Voting all proxies to promote positive social and environmental change.

Committing approximately 1% of fund assets to catalytic community development investments.

¹Reflects the expense ratio as reported in the Prospectus dated April 30, 2022.

²The MSCI ACWI (All Country World) ex U.S. Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the United States. The index consists of 44 country indices comprising 23 developed and 21 emerging market country indices. Indexes are unmanaged, do not incur fees and cannot be invested in directly.

Dividends may be declared and paid semiannually.

Praxis Mutual Funds are advised by Everence Capital Management and distributed through FINRA member Foreside Financial Services, LLC. Investment products offered are not FDIC insured, may lose value and have no bank guarantee.

Fund information

Objective

To seek capital appreciation through a portfolio of equity securities that seeks to reflect the performance of both foreign developed and emerging equity markets, while incorporating stewardship investing criteria.

Strategy

The Fund:

- Features an “optimized index investment strategy,” meaning the returns are generated based on a representative collection of international securities.
- Draws investments from companies domiciled in the developed markets of Europe, Australia and the Far East, and 21 emerging markets.
- Seeks broad diversification among foreign countries and industries.
- Reflects the performance of international markets as measured by the MSCI All Country World ex-U.S. Index, subject to the Fund’s stewardship investing guidelines.

Risks

An investment in this Fund entails the special risks of international investing, including currency exchange fluctuation, government regulations, and the potential for political and economic instability. The Fund’s share price is expected to be more volatile than that of a U.S.-only fund. Equity securities (stocks) are more volatile and carry more risk than other forms of investments, including investments in high-grade fixed income securities. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes. Common stocks, and funds investing in common stocks, generally provide greater return potential when compared with other types of investments.

Account minimums:

- I Shares – \$100,000 for individual funds.
- A Shares – \$2,500 for individual funds³.
- Auto investing – \$100 per month.

Portfolio managers

Aperio Group, LLC focuses solely on index investing, creating and managing customized portfolios for select clients.

Michael Branch, CFA®

³A \$25 annual fee applies to accounts under \$5,000.

Portfolio information

Benchmark: MSCI ACWI ex US Index²

Portfolio profile

Price/Earnings ratio forward	11.5x
Beta	1.00
Turnover ratio	41.6%

Price/Earnings ratio (P/E) is the price of a stock divided by its earnings per share. It gives investors an idea of how much they are paying for a company’s earning power. The higher the P/E, the more investors are paying, and the more earnings growth they are expecting.

Beta rating attempts to measure relative risk. A beta rating of higher than one indicates greater relative volatility than the market. A beta rating lower than one indicates lower volatility than the market, as defined by the MSCI EAFE.

Turnover ratio is the percentage of a fund’s holdings that have been replaced in the last year.
