Price/Earnings ratio forward	22.1x
Beta	1.00
Turnover ratio	20.9%

Price/Earnings ratio (P/E) is the price of a stock divided by its earnings per share. It gives investors an idea of how much they are paying for a company's earning power. The higher the P/E, the more investors are paying, and the more earnings growth they are expecting.

Beta rating attempts to measure relative risk. A beta rating of higher than one indicates greater relative volatility than the market. A beta rating lower than one indicates lower volatility than the market, as defined by the MSCI EAFE.

Turnover ratio is the percentage of a fund's holdings that have been replaced in the last year.

¹The S&P SmallCap 600 Index measures primarily the small-cap segment of the U.S. equity market. Indexes are unmanaged, do not incur fees, and it is not possible to invest directly in an index. Effective Jan. 1, 2017, the Fund changed its primary benchmark from the Russell 2000 Index.

²The Russell 2000 Index is an unmanaged index consisting of the 2,000 smallest of the 3,000 largest stocks. Returns are adjusted for the reinvestment of capital gains distributions and income dividends. You cannot invest directly in an index.

Fund information

Objective

To seek capital appreciation through a portfolio of equity securities intended to reflect the performance of the U.S. small capitalization equities market, while incorporating stewardship investing criteria.

Strategy

The Fund:

- Invests primarily in equity securities and uses “indexing” techniques to approximate the performance of the S&P SmallCap 600 Index, while incorporating socially responsible investing criteria.
- Attempts to minimize risk through diversification.

Risks

The Fund is also subject to small capitalization company risk. Small capitalization companies may not have the size, resources or other assets of large capitalization companies. These small capitalization companies may be more vulnerable to economic, market and competitive pressures than larger companies and therefore may respond differently to market events, and may be subject to greater market risks and fluctuations in value than larger companies. In addition, application of screens may cause the Fund to vary from the performance of its index and other small cap funds.
