All Praxis products are broadly diversified. All are consistent with our work to apply Praxis' faith-driven core values to serve our investors and the world.

To create our portfolios, we apply rigorous Values + ESG screens to exclude industries of moral concern as well as companies with exceptionally poor performance on environmental, social and governance (ESG) issues. We then incorporate various ESG integration strategies designed to strengthen the impact of Praxis portfolios.

Our equity products are broad-based index funds. In our actively managed fixed income fund, we take our impact a step further by specifically targeting investments that embrace positive change.

Praxis Mutual Funds are advised by Everence Capital Management and distributed through Foreside Financial Services, LLC, member FINRA. Investment products offered are not FDIC insured, may lose value and have no bank guarantee.

Foreign investments involve greater risks than U.S. investments, including political and economic risks and the risk of currency fluctuations. There are special risks associated with small capitalization issues, such as market illiquidity and greater market volatility than large capitalization issues.

Equity securities (stocks) are more volatile and carry more risk than other forms of investments, including investments in high-grade fixed income securities.

Investors in any bond fund should anticipate fluctuations in price, especially for longer-term issues and in environments of rising interest rates.

<sup>1</sup>Reflects the expense ratio as reported in the prospectus dated April 30, 2021.

<sup>2</sup>Bloomberg U.S. Aggregate Index is an index of widely held fixed-income securities often used as a proxy for the bond market. It is comprised of the U.S. Treasury and U.S. agency bonds, mortgage-backed bonds, and higher-grade corporate bonds. Indexes are unmanaged, do not incur fees, and it is not possible to invest directly in an index.

<sup>3</sup>The S&P 500 Growth Index represents the growth companies (defined by sales growth, earnings change to price and momentum) of the S&P 500 Index, a universe of large capitalization companies in the U.S. equity market. Indexes are unmanaged, do not incur fees, and it is not possible to invest directly in an index.

<sup>4</sup>The S&P 500 Value Index represents the value companies (defined by book value to price ratio, earnings to price ratio, and sales to price ratio) of the S&P 500 Index, a universe of large capitalization companies in the U.S. equity market. Indexes are unmanaged, do not incur fees, and it is not possible to invest directly in an index.

<sup>5</sup>The MSCI ACWI (All Country World) ex US Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the United States. The index consists of 44 country indices comprising 23 developed and 21 emerging market country indices. Indexes are unmanaged, do not incur fees and cannot be invested in directly.

<sup>6</sup>The S&P SmallCap 600 Index measures primarily the small-cap segment of the U.S. equity market.

<sup>7</sup>Each Class I share is available to any investor with a minimum initial investment of \$100,000. Waivers may be available in certain circumstances. Please contact Josh Bean at 800-503-0905.

<sup>8</sup>A \$25 annual fee applies to accounts under \$5,000.
