Consider the fund's investment objectives, risks, charges and expenses carefully before you invest. The fund's prospectus and summary prospectus contain this and other information. Call 800-977-2947 or visit [praxismutualfunds.com](http://praxismutualfunds.com) for a prospectus, which you should read carefully before you invest. The following applies to each fund within the Genesis Portfolio. The Fund is subject to asset allocation risk, which is the possibility that the selection by the Advisor of underlying funds and the allocation of Fund assets to those funds will cause the Fund to underperform. Because the value of the Fund's investments will fluctuate with market conditions and interest rates, so will the value of your investment in the Fund. You could lose money on your investment in the Fund, or the Fund could underperform other investments. Some of the Fund's holdings may underperform its other holdings. To the extent the Fund is invested in equity funds, it is susceptible to risks typically associated with equity investing, including that the stock market may decline in value and individual stocks held by the underlying funds may not perform as expected. To the extent the Fund is invested in bond funds, it is susceptible to risks typically associated with bond investing, including interest rate risk, or the chance that the value of the fixed-income securities the underlying funds hold will decline due to rising interest rates.
