The Genesis Portfolios are one way Praxis delivers on our commitment to providing convenient, diversified investment options while incorporating stewardship investing principles.

As a “fund of funds,” each Genesis Portfolio invests in Praxis mutual funds (the lowest-cost “I” shares). Each is periodically rebalanced to its target allocation parameters.

The Genesis Portfolios offer a low minimum investment of just $1,000, or $50 monthly. They may also be suitable for many employer-sponsored retirement plans.

*Reflects the expense ratio as reported in the prospectus dated April 30, 2021. The Genesis Portfolios invest primarily in other Praxis Funds and is a shareholder of those underlying Funds. The underlying Funds do not charge the Portfolio any sales charge for buying or selling shares. The annual expense charge includes both the Portfolio’s direct operating expenses and the indirect expenses of the underlying Funds. The net annual expense charge for the Portfolio was 1.76% when the Portfolio was invested. The net annual expense charge for the Portfolio is the contractual fee waiver and reimbursement of certain direct expenses of the Portfolio by the fund’s advisor through April 30, 2022. See the current prospectus for additional information on expenses.

†The composite benchmark is comprised of unmanaged indexes that correspond to the Portfolio’s model allocation. The composite benchmark for each Portfolio consists of:

- **Growth**: S&P 500 Index, S&P SmallCap 600 Index, MSCI ACWI exUS Index, Bloomberg Aggregate. Indexes are unmanaged, do not incur fees and cannot be invested in directly.

Indexes are unmanaged, do not incur fees and cannot be invested in directly.

S&P Target Risk Conservative Index seeks to emphasize exposure to fixed income, in order to produce a current income stream and avoid excessive volatility of return. Equities are included to protect long-term purchasing power. The series is comprised of four multi-asset class indexes. The index is comprised exclusively of exchange traded funds.

S&P Target Risk Growth Index seeks to provide increased exposure to equities, while using fixed income to dampen risk. The series is comprised of four multi-asset class indexes. The index is comprised exclusively of exchange traded funds.

S&P Target Risk Aggressive Index seeks to emphasize exposure to equities, maximizing opportunities for long-term capital accumulation. It may include small allocations in fixed income to enhance portfolio efficiency. The series is comprised of four multi-asset class indexes. The index is comprised exclusively of exchange traded funds.

S&P 500 Index is a widely recognized market capitalization weighted index of widely held stocks often used as a proxy for the stock market.

S&P SmallCap 600 Index measures primarily the small-cap segment of the U.S. equity market.

MSCI ACWI exUS Index is a market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the United States.

Bloomberg U.S. Aggregate Index is an index of widely held fixed-income securities often used as a proxy for the bond market. It is comprised of the U.S. Treasury and U.S. agency bonds, mortgage-backed bonds, and higher-grade corporate bonds. Indexes are unmanaged, do not incur fees, and it is not possible to invest directly in an index.

Consider the fund’s investment objectives, risks, charges and expenses carefully before you invest. The fund’s prospectus and summary prospectus contain this and other information. Call 800-977-2947 or visit praxismutualfunds.com for a prospectus, which you should read carefully before you invest.

Praxis Mutual Funds are advised by Everence Capital Management and distributed through Foreside Financial Services, LLC, member FINRA. Investment products offered are not FDIC insured, may lose value and have no bank guarantee.

The following applies to each fund within the Genesis Portfolio. The Fund is subject to asset allocation risk, which is the possibility that the selection by the Advisor of underlying funds and the allocation of Fund assets to those funds will cause the Fund to underperform. Because the value of the Fund’s investments will fluctuate with market conditions and interest rates, so will the value of your investment in the Fund. You could lose money on your investment in the Fund, or the Fund could underperform other investments. Some of the Fund’s holdings may underperform its other holdings. To the extent the Fund is invested in equity funds, it is susceptible to risks typically associated with equity investing, including that the stock market may decline in value and individual stocks held by the underlying funds may not perform as expected. To the extent the Fund is invested in bond funds, it is susceptible to risks typically associated with bond investing, including interest rate risk, or the chance that the value of the fixed-income securities the underlying funds hold will decline due to rising interest rates.

* Load: Assume maximum sales charge of 5.25%.**
